Subject: Advisory for Exercising Necessary Precautions and Ensuring Readiness in View of Cyclonic Weather System

Madam/Sir,

Based on the IMD bulletin issued at 13:00 hrs on 01.11.2026, NLDC vide communication dated 01.11.2026 has informed that a deep depression over the Southeast and adjoining Southwest Bay of Bengal has intensified and is likely to develop into a Severe Cyclonic Storm, with expected landfall along the South Andhra Pradesh coast between Nellore and Narsapur by morning of 03.11.2026, accompanied by wind speeds of 100-110 kmph, gusting up to 120 kmph.

As per the rainfall forecast, heavy to very heavy rainfall is expected over Coastal Andhra Pradesh, Telangana, Rayalaseema, Tamil Nadu, South Odisha and Chhattisgarh during 2nd–4th November 2026. Extremely heavy rainfall is forecast at isolated places over Coastal Andhra Pradesh on 2nd & 3rd November and Telangana on 3rd November. Heavy to very heavy rainfall is also expected over South Chhattisgarh on 3rd & 4th November. The rainfall intensity is likely to be highest during 2nd–3rd November, with continued heavy rainfall over some regions on 4th November.

As per the communication, several transmission assets, including substations and EHV transmission lines situated in the coastal and adjoining regions of Andhra Pradesh, Telangana, Tamil Nadu, southern Odisha and southern Chhattisgarh may be vulnerable to the impact of the cyclonic system.

In view of the above, it is requested to exercise utmost caution and take all necessary preventive and preparedness measures to safeguard the transmission system and associated infrastructure (under operation as well as under implementation) under your scope. Particular attention may be given to:

- Ensuring readiness of emergency restoration resources, including manpower, vehicles, tools, equipment and essential materials.
- Keeping field teams on high alert for rapid response and restoration in the event of any contingency.
- Reviewing and activating contingency and disaster management plans, wherever required.
- Ensuring reliability of communication systems and availability of critical spares.
- Avoiding non-essential shutdowns and maintenance activities on critical transmission elements during the likely impact period.
- Closely monitoring the weather updates issued by IMD/NLDC and taking timely preventive actions at vulnerable locations.

Accordingly, it is requested to closely monitor the situation and take all necessary measures to ensure safety of personnel and continuity of transmission system operation. Any significant development affecting project execution, site activities or transmission assets may please be brought to the notice of CTUIL immediately.

Yours faithfully

Das 2/11/26

Jiten Das
(ED - CTUIL)
